EDUCATION

B. Tech in Computer Science and Engineering, 2022 – 2026
Vellore Institute of Technology, Bhopal. 8.04

Intermediate (MBPC), 2019 – 2021
Carmel English Medium School, Khurda. Percentage: 80.0

(Secondary School Certificate), 2018 – 2019
Mission School, Jatni. Percentage: 80.0

SKILLS

Languages and Frameworks	TypeScript, Python, JavaScript, SQL, HTML5/CSS3
Frontend Development	React.js, Lightning Web Components, Responsive Design
Backend Development	Node.js, Express.js, Spring Boot, RESTful APIs, JWT, OAuth
Databases and Cloud	PostgreSQL, MongoDB, Database Design, Query Optimization, AWS, Azure, Google Cloud Platform, Nginx, PM2, CI/CD

PROJECTS

Shiksharthee(Online Learning Platform)

- Built full stack application with React frontend and Node.js/Express backend, implementing 15+ RESTful API endpoints with JWT authentication, serving 500+ concurrent users with <200ms response time.
- Designed MongoDB schema with proper relationships and indexing, optimized database queries reducing execution time by 40percent, implemented comprehensive error handling and input validation.
- Deployed on AWS EC2 with Nginx reverse proxy, PM2 process manager, and automated deployment pipeline, achieving 99.8 percent uptime.

Better Help Website

- Developed real-time messaging application using React and Socket.io, implemented dual authentication (OAuth 2.0 + JWT), designed efficient MongoDB schema with 20+ reusable React components.
- Built WebSocket server handling 1000+ concurrent connections with message persistence, typing indicators, and online status tracking, added security measures including CORS, rate limiting, and XSS protection.
- Set up CI/CD pipeline with GitHub Actions for automated testing and deployment, implemented comprehensive middleware for authentication, logging, and error handling.

Securestree (Women Safety Application)

- Built REST API using Spring Boot with MVC architecture, designed normalized PostgreSQL database with proper constraints and indexes, implemented Spring Security with JWT and role-based access control.
- Integrated external APIs (Twilio for SMS, Google Maps for location tracking), implemented asynchronous processing with Spring's @Async achieving sub-2-second emergency notifications.
- Deployed on AWS EC2 with PostgreSQL RDS, auto-scaling configuration, connection pooling (HikariCP), comprehensive logging (SLF4J), and custom exception handling achieving 99.5 percent uptime. .

PROBLEM SOLVING DSA

- Solved 150+ coding problems on LeetCode (Easy: 80, Medium: 60, Hard: 10) covering arrays, strings, linked lists, trees, graphs, and dynamic programming.
- Strong foundation in data structures (Stack, Queue, HashMap, BST, Graph) and algorithms (sorting, searching, BFS/DFS, backtracking).
- Proficient in analyzing time and space complexity, optimizing solutions for efficiency.

CERTIFICATIONS

Full Stack Developer Mern	Smartbridge, 2025
Web Development	1Stop, 2022
Machine Learning with Python	IBM,2025
Introduction to Generative AI	Google Cloud,2025
Data Science with Python	Iamneo, 2025
Data Analytics	Forage, 2025

ACHIEVEMENTS

-
- Student Council Technology Lead: Organized 5+ technical events, built event registration system handling 500+ users using React and Node.js.
 - Graphic Designer: Created UI/UX designs and branding packages using Figma and Adobe Creative Suite for multiple projects.
 - Technical Projects: Built 3 production-ready applications with complete CI/CD, deployment, and monitoring setup.
